

European Mortality Bulletin, Week 23, 2017:

Over the past months all-cause mortality has been normal to low.

Data from 19 countries or regions were received this week and were all included in the pooled analysis of all-cause mortality.

Number of deaths in the past weeks should be interpreted with caution because adjustments for delayed registrations may be imprecise. Furthermore, results of pooled analyses may vary depending on countries included in the weekly analyses. Pooled analyses are adjusted for variation between the included countries and for differences in the local delay in reporting. Further details are available on <http://www.euromomo.eu>

Pooled number of deaths

EuroMOMO: week 23, 2017

— Stratified baseline — Delay-adjusted number of deaths
- - - Normal range (+- 2 z-scores) · · · Substantial increase (4 z-scores)

Participating countries:

Belgium, Denmark, Estonia, Finland, France, Greece, Hungary, Ireland, Italy, Malta, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, UK (England), UK (Scotland), UK (Wales)
